

Assignment 05 - Interactive Visualization I and II

Due Date

April 30th, 2025 by 11:59 pm (with your final project)

Interactive Visualization I and II

1. (15 points) Using your midterm/final project data, create 3 different interactive visualizations using the tools learned in week 11 class/lab. Include the visualizations created on your website hosted on **GitHub Pages**. Make sure to briefly describe the figures (provide a caption *and* a brief summary of what the figure shows).
2. (5 points) Rename your final project website by modifying the relevant text in the `.yaml` configuration file and the YAML header in the `index.Rmd` file. You may also modify the name of your GitHub repo so that the website url also provides a descriptive name.
3. (5 points) Create content across 2 pages on your website. You can use the content from Lab 12 as an example. Label the pages informatively.
